

# SAFETY DATA SHEET

### Hydromx-PG

SECTION 1: Identification of the	e substance/mixture and of the company/undertaking
1.1. Product identifier	
Product name	Hydromx-PG
Chemical name	Solution
1.2. Relevant identified uses of	the substance or mixture and uses advised against
Identified uses	A solution composed of various organic fluids in different proportion and used as 50% Hydromx 50% water in closed circuit cooling and heating systems as a heat transfer fluid.
Uses advised against	No specific uses advised against are identified.
1.3. Details of the supplier of th	e safety data sheet
Supplier	Hydromx INC. 58-75 57th Road Maspeth 11378 NY, USA. Tel.:+1.718.381.0351
1.4. Emergency telephone num	ber
Emergency telephone	HYDROMX +1.718.381.0351
SECTION 2: Hazards identification	tion
2.1. Classification of the substa	nce or mixture
Classification (EC 1272/2008)	
Physical hazards	Not Classified
Health hazards	Not Classified
Environmental hazards	Not Classified
2.2. Label elements	
Hazard statements	NC Not Classified
2.3. Other hazards	
This product does not contain a	ny substances classified as PBT or vPvB.
SECTION 3: Composition/inform	nation on ingredients
3.2. Mixtures	
1,2-Propylene glycol	60-80%
CAS number: 57-55-6	EC number: 200-338-0
Classification Not Classified	

Glycerine	5-10 %	
CAS number: 56-81-5	EC number: 200-289-5	
Classification Not Classified		
Oleic acid	0,1-5 %	
CAS number: 112-80-1	EC number: 204-007-1	
Classification Not Classified		
The full text for all hazard state	ments is displayed in Section 16.	
Composition comments	See section 8 for workplace exposure limits.	
SECTION 4: First aid measure	8	
4.1. Description of first aid mea	asures	
General information	Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical personnel.	
Inhalation	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Skin contact	Remove affected person from source of contamination. Rinse immediately with plenty of water.	
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.	
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.	
4.2. Most important symptoms and effects, both acute and delayed		
4.2. Most important symptoms	and effects, both acute and delayed	
4.2. Most important symptoms General information	and effects, both acute and delayed See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.	
	See Section 11 for additional information on health hazards. The severity of the symptoms described will	
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.	
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure. Gas or vapour in high concentrations may irritate the respiratory system.	
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure. Gas or vapour in high concentrations may irritate the respiratory system. Gastrointestinal symptoms, including upset stomach.	
General information Inhalation Ingestion Skin contact Eye contact	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure. Gas or vapour in high concentrations may irritate the respiratory system. Gastrointestinal symptoms, including upset stomach. Prolonged contact may cause dryness of the skin.	
General information Inhalation Ingestion Skin contact Eye contact	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure. Gas or vapour in high concentrations may irritate the respiratory system. Gastrointestinal symptoms, including upset stomach. Prolonged contact may cause dryness of the skin. May cause temporary eye irritation.	

Commission Regulation (EU) 2020/878 amending Annex II to Regulation (EC) No 1907/2006 (REACH).

SECTION 5: Firefighting measure	S
5.1. Extinguishing media	
Suitable extinguishing media	The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising from	the substance or mixture
Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up.
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
5.3. Advice for firefighters	
Protective actions during firefighting	Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.
SECTION 6: Accidental release m	neasures
6.1. Personal precautions, protect	tive equipment and emergency procedures
Personal precautions	No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage.
6.2. Environmental precautions	
Environmental precautions	Avoid discharge to the aquatic environment.
6.3. Methods and material for con	tainment and cleaning up
Methods for cleaning up	Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Reuse or recycle products wherever possible. Absorb spillage to prevent material damage. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Neutralise with acid. Caution. May generate heat. Following dilution and neutralisation, discharge to the sewer with plenty of water may be permitted. The requirements of the local water authority must be complied with if contaminated water is flushed directly to the sewer. Dispose of contents/container in accordance with national regulations.
6.4. Reference to other sections	
Reference to other sections	For personal protection, see Section 8.
SECTION 7: Handling and storage	9

#### 7.1. Precautions for safe handling

Usage precautions

Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Avoid the formation of mists.

Commission Regulation (EU) 2020/878 amending Annex II to Regulation (EC) No 1907/2006 (REACH).

Advice on general occupational	Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated
hygiene	clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work
	shift and before eating, smoking and using the toilet. Change work clothing daily before leaving
	workplace.

#### 7.2. Conditions for safe storage, including any incompatibilities

Storage precautions	Store in tightly-closed, original container in a dry and cool place. Store away from the following materials: Acids.
Storage class	Acid-reactive storage.
7.3. Specific end use(s)	
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.
SECTION 8: Exposure controls/Pe	rsonal protection

#### 8.1. Control parameters

Occupational exposure limits

#### 1,2-Propylene glycol

Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> particulate Long-term exposure limit (8-hour TWA): WEL 150 ppm 474 mg/m<sup>3</sup> total vapour and particulates

#### Glycerine

Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> mist WEL = Workplace Exposure Limit.

#### 8.2. Exposure controls

Protective equipment

Appropriate engineering controls	Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. The following protection should be worn: Chemical splash goggles.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.
Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.

Commission Regulation (EU) 2020/878 amending Annex II to Regulation (EC) No 1907/2006 (REACH).

Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate ventilation. Large Spillages: If ventilation is inadequate, suitable respiratory protection must be worn.
Environmental exposure controls	Not regarded as dangerous for the environment.
SECTION 9: Physical and chemic	al properties
9.1. Information on basic physical	and chemical properties
Appearance	Liquid.
Colour	Blue.
Odour	Slight chemical smell
Odour threshold	No information available.
рН	pH (concentrated solution): 8,2-8,9 (25°C/77°F)
Freezing Point	<-50°C (<-58°F)
Initial boiling point and range	106°C/222°F
Flash point	Not known.
Evaporation rate	No information available.
Flammability (solid, gas)	No information available.
Upper/lower flammability or explosive limits	No information available.
Vapour pressure	13 kPa @ 60°C/140°F
Vapour density	No information available.
Relative density	1.06 ± 0.01 g/ cm <sup>3</sup>
Density	1052.3 kg/m3 (25°C/77°F)
Solubility(ies)	Completely soluble in water.
Partition coefficient	No information available.
Auto-ignition temperature	No information available.
Decomposition Temperature	No information available.
Viscosity	Dynamic: 12,50 mPa s @ 25°C/77°F
Explosive properties	No information available.
9.2. Other information	
Other information	No information required.
SECTION 10: Stability and reactivity	
10.1. Reactivity	

Reactivity

There are no known reactivity hazards associated with this product.

10.2. Chemical stability	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.
10.3. Possibility of hazardous read	ctions
Possibility of hazardous reactions	No potentially hazardous reactions known.
10.4. Conditions to avoid	
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.
10.5. Incompatible materials	
Materials to avoid	Acid anhydrides. Acids. Phenols, cresols.
10.6. Hazardous decomposition p	roducts
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
SECTION 11: Toxicological inform	nation
11.1. Information on hazard clas	sses as defined in Regulation (EC) No 1272/2008
Acute toxicity - oral	
Notes (oral LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - dermal	
Notes (dermal LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - inhalation Notes (inhalation LC₅₀)	Based on available data the classification criteria are not met.
Skin corrosion/irritation Skin corrosion/irritation	Based on available data the classification criteria are not met.
Serious eye damage/irritation Serious eye damage/irritation	Based on available data the classification criteria are not met.
Respiratory sensitisation Respiratory sensitisation	Based on available data the classification criteria are not met.
Skin sensitisation Skin sensitisation	Based on available data the classification criteria are not met.
Germ cell mutagenicity Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Carcinogenicity Carcinogenicity	Based on available data the classification criteria are not met.
IARC carcinogenicity	None of the ingredients are listed or exempt.
Reproductive toxicity	
Reproductive toxicity - fertility	Based on available data the classification criteria are not met.
Reproductive toxicity - development	Based on available data the classification criteria are not met.

### Hydromx-PG

Commission Regulation (EU) 2020/878 amending Annex II to Regulation (EC) No 1907/2006 (REACH).

Specific targe	et organ toxicity - sing	XDOSUFE
STOT - single		ot classified as a specific target organ toxicant after a single exposure.
Specific targe	ət organ toxicity - repe	d exposure
STOT - repea	ated exposure	ot classified as a specific target organ toxicant after repeated exposure.
Aspiration ha	zard	
Aspiration ha	zard	ased on available data the classification criteria are not met.
General infor	mation	o specific health hazards known. The severity of the symptoms described will vary dependent on the ncentration and the length of exposure.
Inhalation		olonged inhalation of high concentrations may damage respiratory system.
Ingestion		astrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, sulting in the same symptoms as inhalation.
Skin contact		olonged contact may cause dryness of the skin.
Eye contact		ay cause temporary eye irritation.
Route of exp	osure	gestion Inhalation Skin and/or eye contact
Target organ	s	o specific target organs known.
11.2. Information on other hazards No information available.		
Toxicological	information on ingred	ts.
		Glycerine
	Acute toxicity - oral	
	Acute toxicity oral (I mg/kg)	12,600.0
	Species	Rat
	Acute toxicity - derr	
	Notes (dermal LD <sub>50</sub> )	LD₅₀ 56750 mg/kg, Dermal, Guinea pig
SECTION 12	: Ecological information	
Ecotoxicity		ot regarded as dangerous for the environment. However, large or frequent spills may have hazardous fects on the environment.
12.1. Toxicity	<u>/</u>	
Toxicity		ased on available data the classification criteria are not met.
Ecological information on ingredients.		
		Glycerine
	Acute aquatic toxici	
	Acute toxicity - fish	LC₅₀, 96 hours: >5000 mg/l, Fish

Acute toxicity - aquatic plants EC50, 72 hours: >2900 mg/l, Algae

Acute toxicity - microorganisms	EC₅₀, : 10000 mg/l, Pseudomonas putida
12.2. Persistence and degradabili	t <u>v</u>
Persistence and degradability	The degradability of the product is not known.
12.3. Bioaccumulative potential	
Bioaccumulative potential	No data available on bioaccumulation.
Partition coefficient	No information available.
12.4. Mobility in soil	
Mobility	The product is water-soluble and may spread in water systems.
12.5. Results of PBT and vPvB as	ssessment
Results of PBT and vPvB assessr	nent No data available.
12.6. Endocrine disrupting prop	berties
	No data available.
12.7. Other adverse effects	
	No data available.
SECTION 13: Disposal consideration	tions
13.1. Waste treatment methods	
General information Disposal methods	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.
	Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.
SECTION 14: Transport information	on
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).
<u>14.1. UN number or ID number</u>	
Not applicable.	
14.2. UN proper shipping name	
Not applicable.	
<u>14.3. Transport hazard class(es)</u>	
No transport warning sign require	d.
14.4. Packing group	
Not applicable.	

Commission Regulation (EU) 2020/878 amending Annex II to Regulation (EC) No 1907/2006 (REACH).

#### 14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant No.

#### 14.6. Special precautions for user

Not applicable.

14.7. Maritime transport in bulk according to IMO instruments

Transport in bulk according toNot applicable.Annex II of MARPOL 73/78 andthe IBC Code

SECTION 15: Regulatory information

National regulations	Health and Safety at Work etc. Act 1974 (as amended).
	The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2009 (SI
	2009 No. 1348) (as amended) ["CDG 2009"].
	EH40/2005 Workplace exposure limits.
EU legislation	Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures (as amended).
	Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended).
	Commission Regulation (EU) 2020/878 amending Annex II to Regulation (EC) No 1907/2006 (REACH).
Restrictions (Annex XVII Regulation 1907/2006)	No specific restrictions on use are known for this product.
Seveso Directive - Control of major accident hazards	Not relevant.

#### 15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

#### **SECTION 16: Other information**

Abbreviations and acronyms used	TWA: Time weighted Average
in the safety data sheet	WEL: Workplace Exposure Limit
	STEL: Short Term Exposure Limits
	ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road.
	ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland
	Waterways.
	CAS: Chemical Abstracts Service.
	IATA: International Air Transport Association.
	ICAO: Technical Instructions for the Safe Transport of Dangerous Goods by Air.
	IMDG: International Maritime Dangerous Goods.
	PBT: Persistent, Bioaccumulative and Toxic substance.
	vPvB: Very Persistent and Very Bioaccumulative.
	LC₅₀: Lethal Concentration to 50 % of a test population.
	LD₅o: Lethal Dose to 50% of a test population (Median Lethal Dose).
	EC₅₀: 50% of maximal Effective Concentration.

Commission Regulation (EU) 2020/878 amending Annex II to Regulation (EC) No 1907/2006 (REACH).

Key literature references and sources for data	This SDS is prepared based on the information received from the product owner.
Training advice	Read and follow manufacturer's recommendations. Only trained personnel should use this material.
Revision comments	SDS has been revised under the current regulations.
